TARIFF FORMAT

Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the AZ C.C. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14.

Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

- 2.
- 2.1.
- 2.1.1.
- 2.1.1.A.
- 2.1.1.A.1.
- 2.1.1.A.1.(a).
- 2.1.1.A.1.(a).I.
- 2.1.1.A.1.(a).I.(i).
- 2.1.1.A.1.(a).I.(i).(1).

Check Sheets - When a tariff filing is made with the AZ C.C., an updated check sheet accompanies the tariff filing. The check sheet lists the sheet contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages).

ORIGINAL

SECTION 3 - SERVICE DESCRIPTIONS, Cont'd.**3.6 Calculation of Distance**

Usage charges for all mileage sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call.

The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the Wire Center of the Customer's equipment and that of the destination point is calculated by using the "V" and "H" coordinates found in BellCore's V&H Tape and NECA FCC Tariff No. 4.

- Step 1 - Obtain the "V" and "H" coordinates for the Wire Centers serving the Customer and the destination point.
- Step 2 - Obtain the difference between the "V" coordinates of each of the Wire Centers. Obtain the Difference between the "H" coordinates.
- Step 3 - Square the differences obtained in Step 2.
- Step 4 - Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5 - Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6 - Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the Wire Centers.

Formula:

$$\sqrt{\frac{(V_1V_2)^2 + (H_1H_2)^2}{10}}$$

Frame Relay (FR) Service is a digital technology that provides point-to-multipoint data communication, on a packet switched basis, at speeds ranging from 56 kbps to 1.536 mbps. Speeds higher than 10 mbps may be obtained if network is available. Frame Relay access will be provided between the Customer's location and the frame relay switch via a dedicated DS-1 connection. A Customer who elects not to purchase the Company's frame relay access may obtain stand alone access to a frame relay port at telco costs. Any additional telco costs, resulting from a network to network interface, will be passed through to the Customer.

Entrance into the Company's network is accomplished through a port on the FR switch. Ports may be leased at 56 kbps, 128 kbps, 256 kbps, 384 kbps, 512 kbps, 768 kbps, or 1.536 mbps speeds. The Customer is connected to other sites on the network by Permanent Virtual Circuits (PVCs). PVCs, defined in the software of the FR switches, provide the data packets with directional information.

While the Company's network is made up of shared facilities, the Customer is ensured a minimum amount of bandwidth by ordering a specific Committed Information Rate (CIR). The CIR is a necessary component of each PVC and is available as one of three offerings based on port speed: Silver Level at twenty-five percent (25%), Gold Level at fifty percent (50%), and Platinum Level at one hundred percent (100%). Any data packets being sent at a speed above the CIR are labeled discard eligible (DE) and are qualified to be dropped in the event of network congestion.

Frame Relay Service requires the Customer to provide a Frame Relay Access Device (FRAD). The FRAD, functions as a multiplexer and a router, and encapsulates the customers information into a frame suitable for transport over the network.

A specified discount, corresponding to the length of the term agreement, that will apply for the life of the plan, will be applied to the access circuit charges, for two (2) and three (3) year term agreements.

If a Customer terminates service prior to completion of the term commitment, the Customer will pay termination charges for any unexpired portion of the term remaining after the forty-five (45) day notice period required for cancellation of Frame Relay Service. SECTION 3 - SERVICE DESCRIPTIONS, Cont'd.**3.19 Frontier TravelCard**

TravelCard is a personal communication service that allows the caller to dial a TravelCard 800 telephone number and enter a four-digit personal identification routing number (PIRN) to complete a call. TravelCard service is only available in conjunction with Carrier's interstate TravelCard service offering. This calling card service can be ordered independently or in conjunction with other Carrier services.

As a PIRN-based product that can be shared among customers, customers are not granted exclusive use of the 800 number used for accessing the TravelCard service and thus, may not continue to use the 800 telephone number upon cancellation of their service.

To use TravelCard service, the caller dials the 800 telephone number for the TravelCard service. The caller may then (1) enter a PIRN which routes the call to a customer pre-designed telephone number (PIRN CALL); or (2) enter a PIRN which permits the customer to then direct dial a telephone number (DIAL TONE PIRN). Certain PIRNs are reserved for use by the Carrier under TravelCard Service or are used for accessing other services.

3.19.1 Rate Structure

The customer's total monthly usage of TravelCard Service is charged at the applicable rates per minute as set forth on the Flexible Rate Schedule of this tariff, is not distance sensitive, and rates vary by length of contract. TravelCard calls are billed in six (6) second increments with a thirty (30) second minimum for each call. Any fraction of an increment is rounded up to the next whole increment. Operator assisted calls and calls made to directory assistance are charged on a per call basis as set forth in this tariff.

3.20 Frontier VIP

Frontier VIP Standard and VIP Plus are long distance services that provide Customers with single per minute rates for both their inbound (8XX) and outbound (1+) switched and dedicated usage. VIP Standard and VIP Plus are offered dependant upon the availability of Carrier capability.

Customers may subscribe to Frontier VIP Standard and VIP Plus switched and dedicated service on either a Month-to-Month, one, two or three year Term Plan. The Customer's total monthly usage of Frontier VIP is charged at the applicable per minute rates set forth in Flexible Rate Schedule of this tariff. Frontier VIP switched inbound (8XX) and outbound service is billed in six-second increments, with an eighteen-second minimum for each call. Any fraction of an increment is rounded up to the next whole increment. To calculate rounding, the raw usage charge for the call is calculated as the call duration (minimum plus fractional duration) multiplied by the 4-digit (\$0.XXXX) rate value. That amount is then rounded up or down to the nearest whole cent.

Subscribers to VIP Standard and VIP Plus term plan service will be eligible to receive discounts on domestic 1+ and domestic Toll-Free calls. Applicable discounts are based on total monthly (domestic) usage for the respective service. VIP Standard total usage does not include the local services of affiliated ILECs with a billing and collection agreement with the Carrier, while VIP Plus total usage does include these local services. All discount credits will be applied against the customer's interstate usage. Applicable discounts are set forth in Flexible Rate Schedule of this tariff. Subscribers to Frontier VIP Term Plan services will receive a percent discount off the switched or dedicated Term Plan base rate, based on the Term Plan selected. The Volume Discount Levels and applicable discounts are specified in Flexible Rate Schedule of this tariff.

Applicable discounts are set forth in the Flexible Rate Schedule. Subscribers to a VIP Term Plan services will receive a percent discount off the Term Plan base rate, based on the Term Plan and Volume Discount Levels. The Volume Discounts Levels and applicable percent discounts are specified in the Flexible Rate Schedule.

Frontier VIP Standard Term Plans will automatically renew for successive twelve (12) month periods unless the Customer notifies the Carrier in writing before the end of their current term of their intention to terminate the agreement at the completion of the term. Frontier VIP Plus Term Plans will default to VIP Standard month-to-month plans if not renewed. Customers electing to continue receiving service without renewing their current term commitment will automatically revert to the respective switched current effective base rate.

A termination fee, equal to the Number of lines cancelled x number of months remaining on the contract x \$25.00, will be assessed when a VIP Standard or VIP Plus Customer terminates service prior to the completion of the then current term. For a dedicated service customer the "number of lines" is equal to the number of channels (i.e., a T1 loop would constitute 24 lines).

Frontier VIP may be applied at the parent or child account levels. (Allowing different child accounts to have different long distance products). For customers with VIP Plan at the parent account level, all qualified billing rolls up to the parent to determine total monthly billing and the appropriate "super-volume" discount level for that month. Child account discounting will be applied based on the higher (parent or child) VIP Plan term and "total volume" discount. Discounts will be shown per call type at the account level on billing statements.

3.20.3 Ancillary Services

An additional \$1.99 per call surcharge will be assessed on all calls placed for intrastate Directory Assistance. Frontier TravelCard may be used in conjunction with this service.

Any usage above the allotted free minutes will be subject to an overage rate that can be found in the current rates and charges section of this tariff.

A single optional Block of Time (BOT) quantity of minutes can be ordered in conjunction with FrontierWorks LD, in monthly increments of 250, 500, and 1000 minutes, for an additional monthly recurring charge (MRC). The MRC for the BOT is applied at the account level, and can be found in the FrontierWorks LD Plan from Frontier Communication of America's interstate Domestic Price List. Any usage above the 100 free minutes and the BOT minutes will be rated at an intrastate overage rate per minute, and these rates can be found in the current rates and charges section of this tariff. Unused free or BOT minutes do not carry over to the next bill cycle.

Overage rates may vary depending upon which BOT is selected. If a new customer to FrontierWorks LD signs up mid-billing cycle, free minutes and the BOT minutes will be prorated. If moving between BOTs, minutes will be prorated based upon the number of days of that billing cycle and will be charged the appropriate overage rate for the BOT selected at the time the call was completed. Usage will be billed in arrears. Excluded from the BOT minutes are: long distance Directory Assistance, calling cards, and 900 calls.
